

# Forest Service Region 6 – Oregon and Washington Opportunities for Soil and Water Seasonal Positions

**Application period – October 30<sup>th</sup>, 2020 to November 8<sup>th</sup>, 2020**

Apply through [usajobs.gov](http://usajobs.gov)

**Employment would be from May 2021 to November 2021**

Do you want a spring/summer/fall where you work outside? Do you want to learn hands on about land management and collect natural resource data that will be used in management? Do you want to see water, soil, and fire in the Pacific Northwest?

It's not easy. It's not for folks who want to work in laboratory or wear good clothes to an office. It's cold and heat and biting insects and steep hills and hard times. It's dealing with some of our poor and complicated HR systems. MacDonald's will probably pay a similar wage in places. But it is good people, amazing learning, good views, and times where you think, "Why didn't someone tell me sooner I can get paid to do this?"

If you are in, get everything ready in USAjobs and be ready to hit us with an application when the announcements drop.

Questions contact: Jason Jimenez – [jason.jimenez@usda.gov](mailto:jason.jimenez@usda.gov) – Soil Scientist -Colville National Forest.

*It's a crazy fire season, I might be out helping in some way, but I'll get back to you as soon as I am able. I want to help good people work for a good agency doing important work.*
